New Webpage for Wastewater Land Application Permitting Process

The Wastewater Engineering Section has developed a new webpage as part of the implementation of the new Wastewater Land Application Permitting Process. The new webpage contains:

- Permit Process Documents, including the Work Record Request and Application Checklists
- Permit Application Forms, including General Information, Site Selection, Design Data, and Fees
- Monitoring and Reporting form
- Emergency Land Application Request form
- Land Application Resources, including Loading Equations and a Rate Calculator

Please use the following link to view the webpage: <http://www.iowadnr.gov/Environmental-Protection/Water-Quality/Wastewater-Construction/Land-Application-Permits>

The updates and improvements to the Wastewater Land Application Permitting Process include the following:

- An option for emergency land application through the applicant's local field office;
- Flexibility in conducting site survey utilizing a professional engineer or through the local field office;
- Combined construction and operation permits from the Iowa DNR's Wastewater Engineering Section and the NPDES Section; and
- Enhanced tools and resource materials to assist applicants in obtaining timely approvals and permits.

For further assistance, please contact Suresh Kumar at Suresh.kumar@dnr.iowa.gov or at 515-725-8429.
